

The Corality Risk Review

A full assessment of the financial modelling risk within your organisation.

The Corality Risk Review

Understanding and reducing operational, financial and strategic risks is a critical part of corporate governance. The Corality Risk Review offers a full assessment of the level of financial modelling risk within your organisation. Through a combination of workshops, model reviews, in-depth interviews and analytical work, Corality's senior consultants will:

- Identify the key risks within your organisation
- Give you tangible and pragmatic advice on how to reduce these risks
- Recommend long term solutions for continuous improvement

How much would a modelling error cost you?

Effective management of modelling risk will assist you in avoiding major modelling errors and ensure you can make strategic decisions with confidence. It also reduces costly team inefficiencies, improves strategic decision analysis and increases long term profitability.

The Corality Risk Review will help you:

- Manage critical modelling risk
- Reduce costly modelling errors
- Increase modelling productivity and quality
- Make strategic decisions with confidence
