# Corality's training services

Corality is your one-stop-shop training provider. We can provide you with an outstanding solution to all your training needs. Our courses will give your team the skills they need to work more efficiently and ensure their ongoing development and success.

Corality's comprehensive suite of training courses includes:

## 1 Financial modelling and Excel/VBA

Corality's financial modelling and Excel/VBA training will provide your team with the tools they need to confidently and efficiently analyse business cases, operational scenarios, financial statements and strategic options. Course participants will learn how to master our best practice modelling methodology SMART, which will improve their modelling efficiency and assist them in building better models.

### Sample topics include:

- Business case modelling and analysis
- Excel introduction and applications
- Financial modelling of financial statements
- Visual Basic Applications (VBA)
- Forecasting techniques in Excel
- Financial model risk and audit procedures
- Scenarios analysis and decision support

## 2 Project finance

Corality's project finance courses offer useful insights into market practices and conventions as well as best practice project finance modelling techniques. These courses will give your team the skills needed to succeed in this challenging field. Our project finance courses build on our extensive experience in the project finance sector and provide practical insights into what is required for transaction success as well as real life case studies and examples.

### Sample topics include:

- Project finance modelling (basic to advanced)
- Advanced debt modelling and analysis
- International project finance, concepts and case studies
- Industry specific project finance (eg. mining, energy, infrastructure)
- PPP case studies and modelling

## 3 Corporate finance and investment banking

Corality's corporate finance and investment banking training courses will enable your team to maximise corporate value while managing corporate risk across a wide range of areas including mergers and acquisitions, valuations, capital structuring and debt/equity raisings.

### Sample topics include:

- Valuations concepts and applications
- Mergers & Acquisitions modelling
- Private equity modelling and case studies
- Investment banking concepts and applications
- Strategic options analysis
- Start-up funding analysis/venture capital

## 4 Industry specific courses

Corality's industry specific courses are developed and presented by industry professionals who are experts in their field. Our course presenters understand the requirements of business analysts, consultants, investment professionals, operational staff and senior management across a broad range of sectors and will provide your team with the skill set required within each particular area.

### Sample topics include:

- Infrastructure – financial modelling and case studies
- Mining – financial modelling for project evaluation
- Oil and Gas – concepts and applications
- Energy – financial analysis and funding options
- Real estate – financial analysis of property developments
- Retail – advanced financial modelling for the retail sector

# The Corality advantage

## Tailored training courses – we provide exactly what you need

Corality's tailored in-house training courses cater specifically to your needs. Our extensive library of training materials along with the experience of our professional trainers ensure we can tailor and develop courses according to your individual requirements, knowledge and experience.

## Team development – we ensure your team's ongoing success

Corality's courses will transfer the expert knowledge of our experienced team to yours. We believe in an interactive, personal approach to training where industry experts share their insights and practical tips in a 100% hands-on environment. Our professional trainers are currently active industry professionals who will help you build your team's capabilities.

## Global delivery – we make it easy

Corality delivers public and in-house training courses globally. Our tailored courses can be delivered anywhere world wide and our public courses are scheduled regularly across Europe, the United States, Canada, Africa, Australia and Asia.

## Tools, templates and knowledge – we transfer our industry experience

Corality's courses are all developed and delivered by currently active industry professionals. Our courses will give your team the tools, templates and knowledge they need to be able to hit the ground running. Our team of experts consists of analytical consultants with backgrounds in banking, strategy, accounting, actuarial, mathematics, engineering, IT and physics with experience across many sectors. The content of all of our courses is based on our extensive experience and all courses are regularly updated.

## Benefits of attending a Corality course

### Get ready for your next challenge

Corality's training portfolio has something to offer everyone, from operational staff to analysts, investment professionals and senior management. Corality courses will help you to build your capabilities throughout your career and gain the tools for success in your field.

### Learn from active industry professionals

Our courses are developed and delivered by dedicated industry specialists with real life experience. All courses incorporate current, tailored case studies and examples. By attending one of our courses you will gain insights from a team of experts who are all currently active in their field, not just trainers.

### Master key skills in an interactive learning environment

Corality's courses will see you enjoy highly personalised coaching from active industry professionals. Public class sizes are strictly limited for maximised learning through individual attention. Our courses are 100% hands-on and we encourage you to bring your own problems or discussion points.

### Benefit from ongoing education

Our extensive range of online tutorials, e-books and workbooks allow your learning to continue long after the course is finished. We regularly shares tips and tricks, industry insights and other useful knowledge through our Web Resources portal. Following a course, you can ask your trainer further questions to make sure that you are on the right track.

## Corality training services – why use us

- ▶ **What we offer:** comprehensive suite of public and tailored training
- ▶ **Training course areas:** financial modelling, Excel/VBA, Project Finance, Corporate Finance and Investment Banking and industry specific courses
